Automation Projects

• GSC Dashboard

Auto-detects and alerts the team the moment site tracking scripts break or CTR drops, preventing SEO data loss

• GA4 Dashboard

Sends product-wise GA4 performance alerts to respective members for faster response to traffic drops.

• Carbon Dating Tool

Detects a URL's first-published and last-updated dates, flagging stale content for refresh and supporting content-freshness SEO signals.

• Tasks Dashboard

Claude AI-powered dashboard tracking SEO team tasks and deadlines, improving visibility and accountability.

• Light House Automation

Monitors Google Lighthouse scores across pages, flagging performance regressions before they hurt rankings.

• Disavow Automation

Identifies toxic/spammy backlinks and auto-generates disavow files to protect domain authority.
